

How your money helps our medical research

Shopping list

These examples show what can be done with the money you give us:

- £10** can fund essential laboratory items such as pipettes used in research which could revolutionise cataract treatment in children
- £20** can fund an hour of a research midwife's time
- £50** can fund a week's worth of gene therapy testing agents to help develop a treatment to prevent infection-related preterm birth and brain injury
- £60** can fund one MRI scan to research how to treat children with sickle cell anaemia
- £100** can fund a researcher for a day on a potentially life-saving project
- £280** can fund a pioneering research project for a day
